DESCRIPTION:

Regain control with Uxor!

Uxor is a 7.5% benzocaine gel formulated to reduce excess penile sensitivity.

Designed for men, Uxor helps to prevent premature ejaculation by delaying the time of ejaculation during penetration.

Uxor is applied directly on to the body, the gland and along the dorsal vein of the penis, 5 to 10 minutes before sexual intercourse.

Uxor is for men who:

- want to regain control over their ejaculation
- ejaculate before they wish
- desire to improve their sexual performance
- wish to delay the moment of ejaculation during sexual activity

Uxor is an anaesthetic of choice for the treatment of the premature ejaculation.

AVAILABLE FORMAT:

Tube 56,7g
