

DESCRIPTION:

Oriderma is a dermatological repairing ointment.

Prepared with Zinc Oxide, Oriderma allows superior wound healing.¹

Its patented formula is ideal for post interventions (stitches, post-laser, post peeling, etc.) and minor skin lesions (open wound, burns, etc.)

Zinc Oxide has proven to hold antifungal and antibacterial properties that can prevent the infection.

Results:

- aesthetic skin repair
- shortened healing time
- faster return to regular activities

AVAILABLE IN 2 FORMATS:

- Tube of 15g
- Tube of 60 g
