

ViDextra

DESCRIPTION:

Sun in a bottle!

Finally, a convenient way to take your Vitamin D.

ViDextra is a Vitamin D₃ supplement containing a high dose of 10,000IU per tablet. ViDextra is intended to be taken once a week. With its small easy to take tablet, it is hard to find a better Vitamin D₃ supplement.

According to Osteoporosis Canada and Health Canada, a regular intake of Vitamin D plays a key role in the absorption and use of calcium and phosphorus and contributes to the development and maintenance of bones and teeth.

For these reasons, Vitamin D is an essential supplement for the use of calcium which helps to prevent osteoporosis and fractures.

Take ViDextra as recommended by your Health Care Practitioner.

***Once a week, make your
Sundays even sunnier!***

Rx REQUIRES A PRESCRIPTION

AVAILABLE FORMATS:

Bottle of 60 Tablets
